

The Newspaper & Hybrid Production Workflow Solution

"I was impressed with the simplicity and flexibility NEWSflo brought to our environment. Polkadots has provided a solution that meets our expectations 100%. All of our requirements including Templates, Ripping, Page Pairing, Furniture, Hard Proof, Output to Film, Soft Proof, Integration to our Ink System and ftp servers were configured and put into production in a matter of days. Polkadots provides exemplary customer services; no matter the time or day of the week; you always get the help needed..."

Jhon Marte
Director Client Systems
The Chicago Tribune

"We have been through 2 other installations for similar products. One worked fairly well but lacked the features and sophistication of NEWSflo; the other was, for lack of better words – a nightmare! After about 12 hours of training I realized that NEWSflo was designed to work like the press and everything made perfect, logical sense. From then on, working with NEWSflo has just come naturally. We print 2 Daily papers here as well as 17 weeklies plus specialty products, we also print for 60 commercial customers – all using NEWSflo. This is about the most problem free solution I have ever seen. We had our CTP installed on Oct. 23 and we started producing 100% of our work with NEWSflo on Oct. 24, we have not used anything else since then. NEWSflo is the slickest software I have ever used"

Vince Cribb
VP Production
South Georgia Media Group

"We have been using PrePage-it NewsFlo for some time now and we love it. The "RIP once output many" works just like it says. We haven't had any late night ad problems in a very long time. I like to say that the eps files we hand the pagination department here at the paper are "certified". They are certified by PrePage-it, that there won't be any problems in the future with the files.

The stability of the software is pretty standard. We have had a few quirks now and again, but that is to be expected. The level of customer support is phenomenal though. Any time we have had any problems, they are addressed immediately and to the most professional level. Put it this way, since we have been on this system, we have not missed any deadlines!

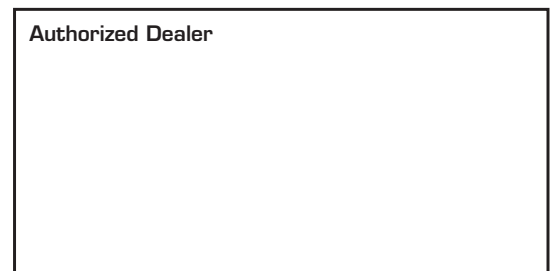

Overall I rate this product a 9.5 out of 10."

Brian Burbank
Systems Manager,
The Pocono Record

"Buying PrePage-it was like putting cash in the bank, with a guaranteed immediate return on investment!"
