NO-PROCESS PRINTING PLATES

Experience the freedom of no-process for your print operation

This is not just anyone's no-process plate – this is Southern Lithoplate's NO-PROCESS plate!

We have been on a mission: to refine, enhance and improve the technology of no-process plates so that we could deliver a product that meets the highest demands of our customers' needs for quality, performance and affordability.

Printers, you now have LIBERTY!

Liberty means no plate processing chemicals to buy. No spent chemicals to dispose of. Liberty means you get to print faster, with better print quality, less cleanup and remarkable savings over traditional processed products.

Let Freedom Ring!!

Liberate yourself from plate processing.

No more baking. No more waiting. Southern Lithoplate's Liberty NXP lithoplate delivers "out of the box" simplicity for instantaneous printing.

Plus, Liberty NXP is a Southern Lithoplate technology so you know you can depend on its quality, performance and the utmost in service and availability.

Liberty NXP meets today's needs for performance, quality and sustainability

Finally. A true, no-process printing plate that lives up to printers' expectations and needs for quality and performance under actual production conditions. The Liberty no-process plate helps achieve your operation's goals for print quality, time savings, energy savings and low environmental impact.

The Liberty NXP is a nonablativ negative working polymer-coated plate which can be laser imaged right out of the box and mounted on the plate cylinder of any offset press. Available in 0.008" and 0.012" aluminum material, this plate is electrochemically grained and anodized with a proprietary post treatment that permits reduced water and ink settings.

It operates at 120 mJ/cm² on any thermal platesetter within a 810-830 nm range. The Liberty NXP plate delivers a resolution of 1-99% at 200 lines per inch, with screening to 20 microns. Plus, it meets the demands for imaging quality up to 2400 dpi resolution.

Liberty NXP plates deliver run lengths of 150,000, depending on press conditions, have a shelf life of 12 months with recommended storage and are safelight, white light stable for 4 hours or more at Lux Levels ≤ 600. The plate is UV exposure/film capable.

Experience the freedom of no-process plates with Liberty NXP.

And experience the difference Southern Lithoplate can make as your prepress and print support partner. Our commitment to quality, value, and performance and to your print profitability is what makes SLP stand out among all other providers. Liberty is at hand with Southern Lithoplate at your side.

Here are just a few of the advantages Liberty affords prepress/print operations:

- Consistent make-readies for the life of the product
- Linear, non-sharpening and durable dot reproduction
- Economical, eco-friendly plate production
