**NEWS PUBLISHERS' PRESS INSTALLS COMPUTER TO PLATE SYSTEM
FROM SOUTHERN LITHOPLATE INC.**

Glendale, California, January 15, 2009 – News Publishers' Press has contracted with Southern Lithoplate to convert from conventional analog plate-making to Computer to Plate using thermal plate imaging technology. The changeover from analog film and plates was made in late 2008

News Publishers' Press has installed a SCREEN NEWS 2000LE thermal plate-recording machine with an in-line Proteck 105 plate processor and Southern Lithoplate's Viper® 630 thermal plates. The integrated offering forms part of the Southern Litho CtP Alliance. The system produces 26 plates per hour when using 35ins x 23.2ins plates at a resolution of 1,200 dpi.

Robert Garcia Production Manager stated "We quickly found that the CtP technology not only saved production time, but also gave us an improvement in print quality".

About Southern Lithoplate, Inc.,
